

INTRODUCING EDGE:
A Literacy and Math
Virtual Learning Program

Education desperately needs a change...

a disruption at its core and
a brave new take on the
way things are done.

**We are that
change, and
fearless learning
is the way.**

Learning Challenges

But as it stands now, we have a very real problem.

Of people with reading difficulties, 70-80% are likely to have some form of dyslexia. It is estimated that 20% of all students are affected. Moreover, up to 7% of all students suffer from severe difficulty performing math calculations known as dyscalculia. Wheeling Country Day School (WCDS), a 501(c)3 nonprofit, has a scalable solution in Edge, a newly-branded literacy and math virtual learning program.

Bringing Fearless Learning to Every Student

Edge brings fearless learning to students everywhere, embracing the challenges and beauty of the brain while removing the pain and chore of surviving school.

It develops courage to dive headlong into learning with no need for a net.

It supports learning with no fear.

We've been at this work for over a decade at our Wheeling, West Virginia location. Now, we're leveraging technology to scale our reach to support young people who learn reading and math differently throughout our greater region. We're currently piloting programs in partnership with out-of-school time networks including The Boys & Girls Club, West Virginia University's Energy Express, and the YMCA. Educators with Edge are expertly trained in structured literacy to overcome learning differences in both reading and math, so students can thrive in and out of the classroom.

Want to FearLESS with us?

We're seeking interested out-of-school time partners. We're expanding partnerships with higher education to grow our network of tutors.

To learn more about partnerships or to become an investor in this work, contact Theresa Kowcheck (Director) at tkowcheck@wcdsdu.com or call 304-232-2430 and ask for Edge.
